Dear Valued Customer,

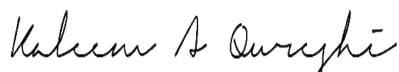

Baxter is currently experiencing challenges regarding its third party manufacturer's delivery of INTRALIPID (20% I.V. Fat Emulsion). In the interest of maintaining balanced access to available supply, effective the date of this letter, Baxter is placing Intralipid on a 30% allocation for customers that do not compound Parenteral Nutrition (PN) for pediatric patients. Customers that are children's hospitals that compound pediatric PN will continue to receive their current 100% allocation only through direct purchases from Baxter. All other customers can continue to access their 30% allocation either direct from Baxter or through their wholesaler/distributor channel. The calculation period for the allocation is the monthly average of your purchases during the six months from November 2022 through April 2023. The Intralipid codes that are impacted are listed below.

Product Description	Product Code	National Drug Code	Pediatric PN Customers	All Others
INTRALIPID, 20% IV Fat Emulsion, 100 mL	2B6061	0338-0519-58	100% Direct purchase only	30% Direct purchase or through wholesaler/distributor channel
INTRALIPID, 20% IV Fat Emulsion, 250 mL	2B6062	0338-0519-09		
INTRALIPID, 20% IV Fat Emulsion, 500 mL	2B6063	0338-0519-13		
INTRALIPID, 20% IV Fat Emulsion, 1000 mL	2B6064	0338-0519-14		
INTRALIPID, 30% IV Fat Emulsion, 500 mL	2B6065	0338-0520-13	100% (Direct purchase or through wholesaler/distributor channel)	

Other Lipid Injection Emulsions (ILE), where appropriate for certain patients, may be available from Baxter or other manufacturers. Baxter's Medical Affairs team is available for clinical support or questions to assist during this supply constraint.
