NovumIQ

INFUSION PLATFORM

THE NEXT  
GENERATION  
OF INFUSION  
PUMPS

**ISN'T JUST  
A PUMP**

It's an integrated, intelligent  
ecosystem designed to  
support complex infusion  
practices for your patients.

## INFUSION THERAPY INNOVATION IS URGENTLY NEEDED

Smart infusion pumps are widely regarded as the standard of care in infusion delivery. However, many infusion errors continue to occur despite their use.<sup>1</sup>

# 1.2M

hospitalizations per year  
are estimated to include  
preventable injectable  
medication adverse events<sup>2</sup>

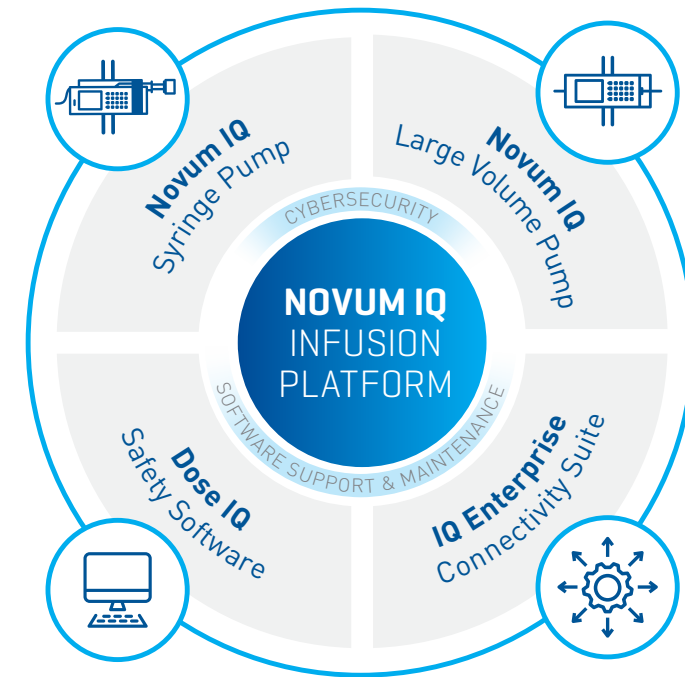

# 61%

of serious and life-  
threatening medication  
errors are associated  
with IV infusions<sup>3</sup>

# 85%

of all medication errors  
reach the patient when  
an infusion pump is used  
for medication delivery,  
according to one study<sup>4</sup>

## THE **NOVUM IQ** INFUSION PLATFORM REVOLUTIONIZES INFUSION DELIVERY

Bringing together the **Novum IQ** Large Volume Pump, the **Novum IQ** Syringe Pump, the **IQ Enterprise** Connectivity Suite and **Dose IQ** Safety Software, the **Novum IQ** Infusion Platform is transforming infusion delivery. Baxter's "one platform" ecosystem is designed to enhance infusion safety, streamline infusion administration and enable the continuous evolution of infusion technology.

## BENEFIT FROM AN ELEVATED INFUSION EXPERIENCE

The **Novum IQ** Large Volume Pump and the **Novum IQ** Syringe Pump share advanced technology and enhancements to help protect patients and standardize infusion administration.

- **Streamlined workflows and intuitive operation** to drive compliance in the use of pump safety software, helping to ensure a safe continuum of care for patients
- **Easy-to-use common interface** across large volume and syringe pumps, supported by 350+ hours of human factors testing,<sup>5</sup> which helps to simplify pump operation for clinicians and streamline training
- **On-screen barcodes with scan prompts** ensure that pumps are correctly identified, helping to provide safety and efficiency during auto-programming and drive auto-programming compliance
- A **visual beacon** so clinicians can see from a distance that a pump needs attention
  - A **backlit keypad** and an **ambient light sensor** to improve visibility

Baxter Single Set technology accommodates both large volume pump and gravity infusions to deliver efficiency, safety and savings.<sup>6</sup>

A broad range of compatible syringes have been qualified for use with the **Novum IQ** Syringe Pump.

## IQ ENTERPRISE CONNECTIVITY SUITE: ENTERPRISE INTELLIGENCE AT THE CENTER OF PATIENT CARE

Driving seamless infusion system integration and efficient data management, the **IQ Enterprise** Connectivity Suite helps clinicians optimize infusion administration practices and enhance infusion safety.

RELY ON DOSE IQ SAFETY SOFTWARE to help you protect more infusions and reduce the risk of preventable errors

Accurate and up-to-date drug libraries are important to help ensure patient protective measures are maintained throughout infusion therapy, especially for patients receiving critical medications. However, even when drug libraries are used, current implementation practices can limit their effectiveness.

In one study,  
**31%** of started infusions used an outdated drug library<sup>7</sup>

At every step, web-based **Dose IQ** Safety Software helps you build and deploy one of the safest and most effective drug libraries possible.

DRUG LIBRARY COMPLIANCE

**Dose IQ** Safety Software compliance within one month of implementation<sup>8</sup> in relation to ISMP goal<sup>9</sup> and industry average<sup>10</sup>

**Dose IQ** Safety Software offers unique and best practice capabilities.

- Titration Error Prevention technology, which allows **Novum IQ** pumps to intercept dose and rate changes that could be potentially harmful
- Unique drug-linking feature that provides more library capacity and flexibility with 32 care areas and 10,000+ drug entries across large volume and syringe pumps
- Comprehensive units of measure, including MillionUnit dosing
- Color coding for enteral infusions
- Configurable anesthesia care area settings, with optional passcode protection
- Standardized drug library creation in partnership with First Databank (FDB) and incorporation of its FDB Infusion Knowledge database

**Dose IQ** Safety Software provides flexible software accessibility options through installation on a hospital-owned virtual machine or through a Baxter-hosted cloud-based solution.

MAXIMIZE YOUR INVESTMENT with breakthrough design innovations coupled with product implementation and software support and maintenance

**95%** field serviceability to help get pumps back in use, potentially reducing cost and downtime

- Modular design** with cost-effective field-replaceable units to streamline service and maintenance
- Full system self-test** at start-up to check system status and provide error codes for easier diagnosis and repair
- Remote troubleshooting and diagnostics** combined with parts ordering, to help reduce maintenance burden

COUNT ON RIGOROUS CYBERSECURITY to provide advanced protection for patients' infusion data

The **Novum IQ** Infusion Platform is built to meet stringent cybersecurity protocols.

- UL 2900 certification, which attests to independent cybersecurity testing and assessment for the **IQ Enterprise** and **Dose IQ**<sup>2</sup>
- Secure remote updates to **IQ Enterprise** Connectivity Suite on both servers and network
- Encrypted software and firmware to pumps
- Collaboration with Health-ISAC and ICS-CERT organizations

A Baxter-led Universal Implementation Process (UIP) engages all facility stakeholders and spans pre-implementation planning, drug library build, product training and post-implementation follow-up.

Available after product implementation, the **Novum IQ** Infusion Platform with **PartnerAdvantage** Services program focuses on software support and maintenance and offers ongoing training and support resources for your staff, including IT personnel, biomedical engineers, clinicians and pharmacists. Facilities can tailor their package of services to accommodate a nonintegrated infusion platform until such time as they opt for full interoperability.

# NOVUM IQ INFUSION PLATFORM

## ONE PLATFORM. ONE ECOSYSTEM. ADVANCED TECHNOLOGY.

For more information, contact your Baxter Sales Representative, call us at **1-800-422-9837** or email us at **[cfs\\_customer\\_service@baxter.com](mailto:cfs_customer_service@baxter.com)**.

### INDICATIONS FOR USE — **NOVUM IQ** SYRINGE PUMP

The **Novum IQ** syringe pump is intended to be used for the controlled administration of fluids. These include pharmaceutical drugs, parenteral nutrition, blood and blood products, and enteral nutrition. The **Novum IQ** syringe pump is intended to deliver an infusion through the following clinically accepted routes of administration: intravenous, arterial, enteral, and subcutaneous. The **Novum IQ** syringe pump is intended to be used in conjunction with legally marketed and compatible administration sets, syringes, and medications provided by the user. The **Novum IQ** syringe pump is suitable for patient care in hospitals and outpatient health care facilities. The **Novum IQ** syringe pump is intended for use on adults, pediatrics and neonates. The **Novum IQ** syringe pump is intended to aid in the reduction of operator interaction through guided programming, including a way to automate the programming of infusion parameters and documentation of infusion therapies when integrated with an Electronic Medical Record (EMR) system. This automation is intended to aid in the reduction of programming errors. The **Novum IQ** syringe pump is intended to be used by trained healthcare professionals.

### INDICATIONS FOR USE — **NOVUM IQ** LARGE VOLUME PUMP (LVP)

The **Novum IQ** LVP is intended for use on adults and pediatrics subpopulations, except for neonates, for the controlled administration of fluids, pharmaceutical drugs, parenteral nutrition, blood and blood products through the following clinically accepted routes of administration: intravenous, arterial, subcutaneous and epidural. The **Novum IQ** LVP is intended for use on neonates, for the controlled administration of fluids and parenteral nutrition through the following clinically accepted routes of administration: intravenous and arterial. The **Novum IQ** LVP is intended to be used in conjunction with legally marketed and compatible administration sets, and medications provided by the user. The **Novum IQ** LVP is suitable for patient care in hospitals and outpatient health care facilities. The **Novum IQ** LVP is intended to aid in the reduction of operator interaction through guided programming, including a way to automate the programming of infusion parameters and documentation of infusion therapies when integrated with an Electronic Medical Record (EMR) system. This automation is intended to aid in the reduction of programming errors. The **Novum IQ** LVP is intended to be used by trained healthcare professionals.

**Rx only.** For safe and proper use of the products mentioned herein, please refer to the appropriate Operator's Manual or Instructions for Use.
